

STUDENT ENROLLMENT & COURSE MANAGEMENT SYSTEM

8. PROJECT DEMONSTRATION

8.1 Demonstration Objective

the objective of the demonstration is to showcase the working Student Enrollment & Course Management System, including student registration, course management, enrollment processing, data validation, security, and report generation. It highlights how the system simplifies academic administration, reduces manual work, and improves data accuracy.

8.2 Demonstration Prerequisites

- Working Student Enrollment & Course Management System.
- Stable internet connection.
- Valid student, faculty, and administrator login credentials.
- Sample student, course, and enrollment records.
- Configured database and user permissions.
- Access to reports and dashboards for demonstration.

8.3 Demonstration Steps

Step	Demonstration Activity
Step 1	Open the App Launcher and select the “Student Enrollment & Course Management System” application.
Step 2	Open the Student tab, select New, enter student details such as Name, Email, Phone Number, and Address, and save the record.
Step 3	Open the Course tab, create a course, enter Course Name, Course Code, Duration, Fees, and Department, and save the record.
Step 4	Open the Faculty tab, enter faculty details such as Name, Email, Department, and Qualification, and save the record.
Step 5	Open the Enrollment tab, select the appropriate Student and Course, enter Enrollment Date and Status, and save the record.
Step 6	Open Reports and display student enrollment reports, course details, and enrollment information.

Step 7	Open Dashboards and display student enrollment statistics, course availability, and enrollment summaries.
-----------	---

8.4 Expected Demonstration Result

The demonstration is expected to show that the Student Enrollment & Course Management System successfully manages student records, course details, faculty information, and enrollment activities. It should demonstrate accurate data entry, secure access, proper record relationships, and successful report generation. The system aims to reduce manual work, improve data accuracy, and simplify academic administration.

8.5 Final Demonstration Checklist

- Application opens successfully.
- Student registration and login work correctly.
- Student records can be created and saved.
- Course details can be added and managed.
- Faculty records can be maintained.
- Student enrollment functions correctly.
- Data validation works properly.
- User access permissions are configured.
- Reports display accurate information.
- Dashboard displays enrollment statistics.
- System operates without major errors.

8.6 Demonstration Conclusion

The demonstration successfully showcases the Student Enrollment & Course Management System and its major functionalities, including student registration, course management, enrollment processing, data validation, and report generation. The system provides a centralized, secure, and efficient solution for simplifying academic administration and reducing manual work.
